

PRISMA Connect

- Improves fleet productivity
- Instant operational overview of activities
- Flexible and customized to your business
- Reinforces accounting and company guidelines

METOCEAN SYSTEMS

PRISMA Connect is the trusted solution for vessel tracking and data services. Our world-class, web-based software solution provides access to fleet-wide data through cellular and satellite communications. PRISMA Connect improves maritime operational efficiencies by connecting shore-side operations with your fleet at sea and increases crew productivity via two-way messaging and electronic forms.

This innovative management system provides fleets of all sizes with heightened performance and increased responsiveness for enabling end-to-end connectivity from workstations on shore to vessels at sea, on inland waterways, or anywhere in the world. In addition to vessel tracking, route planning and historical data and reporting, PRISMA Connect offers innovative software features such as weather reports for complete maritime domain awareness and geofencing for compliance with protected or restricted zones. Real-time visibility to vessels is delivered through automated mapping.
