

NOVATECH Minibeacon Pressure Switch Adapter

- Add-on pressure switch
- Submersible to 7,300m
- Activates at the 10m threshold

TRACKING & MONITORING

NOVATECH™ products have been proven throughout the world's oceans and trusted around the globe for over 40 years.

The NOVATECH Minibeacon pressure switch adapter is an add-on pressure switch that can be used with any NOVATECH Mini series beacon. It can be submerged for long periods of time in ocean depths up to 7,300m (24,000 feet). The pressure switch automatically turns the beacon OFF below 10m, effectively isolating the power source, and ON when it returns above the 10m threshold.

The pressure switch adapter provides beacons using conductivity sensors with a surface detection method that is less susceptible to bio-growth. It offers beacons a longer term deployment duration and activates before surfacing, at the 10m threshold.

NOVATECH Minibeacon Pressure Switch Adapter

TECHNICAL SPECIFICATIONS

PRODUCT DIMENSIONS

- Overall Height: 3.69 inch (93.7mm)
- Material: Titanium
- Weight: 402 grams

KIT CONTENTS

- 1 NOVATECH Minibeacon Pressure Switch Adapter Accessory
- 1 O-ring Grease
- 1 Small O-ring - M1.5x22, 90 Durometer
- 1 Large O-ring - 2-218, 70 Durometer

COMPATIBLE WITH THE FOLLOWING BEACONS:

- iBCN
- MMF
- MMB
