

# STREAM1 USE CASES

2025-05 v1

## **STREAM1** PRODUCT USE CASES

**Fleet Tracking | Asset Tracking | Battlefield Logistics | Agricultural Data | Maritime Data**  
**Cellular Backup | Worker Safety**

### Fleet Tracking

With the STREAM1 or a 9704 enabled product you've built and certified with our support, you can ensure your fleet stays connected, providing accurate, real-time updates on location and status. Whether managing logistics in remote regions, optimizing delivery routes, or monitoring assets in challenging conditions, we'll work closely with you to develop a solution that meets your unique needs.

### Asset Tracking

Transporting high-value items like sensitive equipment or luxury goods demands reliable and secure tracking solutions. By using STREAM1 or collaborating with us to certify your custom 9704 product, you can achieve constant monitoring of your assets' location and condition. Our expertise ensures you have the tools to protect what matters most, giving you peace of mind and minimizing risks during transit.

### Battlefield Logistics

In high-stakes defence operations, timely and reliable data can make all the difference. We help you leverage STREAM1 or support you in building and certifying your custom 9704 solution to send secure, real-time transmissions, whether it's supply locations, equipment updates, or other critical information. Together, we'll ensure your teams have the connectivity they need to make the right decisions under pressure.

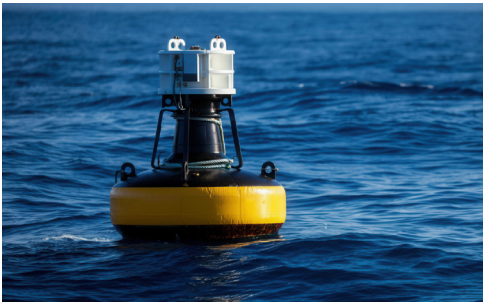

**Empowering Data Connectivity, Everywhere.**

## Agricultural Data

Modern farming relies on accurate, real-time data to optimize yields and manage resources effectively. Whether you're monitoring soil conditions, irrigation systems, or weather sensors, STREAM1 or a custom 9704 solution we help certify can provide the reliable connectivity you need. We'll work with you to integrate a system that enables you to make smarter, data-driven decisions to grow your operations.

## Maritime Data

The maritime industry operates in some of the world's harshest and most isolated conditions and collecting and transmitting data from the open sea can be a significant challenge. Whether you're working with buoys, research sensors, or vessels, STREAM1 or a custom 9704 product we help you certify can ensure consistent, real-time data transmission. From advancing scientific research to improving navigation, we'll partner with you to tackle the challenges of maritime connectivity.

## Cellular Backup

When cellular networks fail, maintaining reliable data transmission is critical to keeping operations running smoothly. With STREAM1 or a custom 9704 enabled backup system certified with our guidance, you can seamlessly transition to satellite connectivity during outages. We'll help you implement a dependable solution that ensures your business stays connected, no matter the circumstances.

## Worker Safety

Ensuring the safety of lone workers in remote or hazardous locations where they rely on dependable safety systems for their well-being is a top priority. Using STREAM1 or a custom 9704 enabled safety solution certified with our assistance, you can provide real-time transmission of location and emergency data. We'll work together to design a system that prioritizes your team's safety and gives you confidence that help is always within reach.
